4-Patient Progress

The Patient Progress Monitoring System in Zoho Creator helps healthcare providers efficiently track and manage patient recovery and treatment updates. It enables medical staff to record patient details, update progress status, document current health conditions, and compare them with previous check-up records. The system securely stores patient information in the cloud, allowing authorized users to access and update records in real time. It also improves accuracy, reduces paperwork, facilitates faster decision-making, and generates reports for better patient care and treatment management.

INPUT

The screenshot displays a web browser window with multiple tabs, including 'zoho creator login - Yahoo Indi...', 'roshinithalapathi - Hospital - P...', and 'Zoho Creator'. The active tab shows the URL 'creatorapp.zoho.in/roshinithalapathi/environment/development/hospital/#form:Progress_Update'. The browser interface includes a search bar with 'Ask Gemini', navigation icons, and a status bar indicating 'View as -MySelf-', 'Trial expires in 13 days', and 'Upgrade' options. The application interface features a dark sidebar on the left with the 'Hospital' logo and a menu containing 'Progress Update' (selected) and 'Progress Details'. The main content area, titled 'Progress Update', contains a form with the following fields: 'Patient Name' (split into 'First Name' and 'Last Name' input boxes), 'Medical Record No. (or Patient ID)' (a text box with a masked input '#####'), 'Progress Status' (radio buttons for 'Improved', 'No Change', and 'Worsen'), 'Problems' (a large text area), 'Current Condition' (a large text area), and 'Condition On Last Check-up' (a large text area). At the bottom of the form are 'Submit' and 'Reset' buttons. The bottom of the sidebar shows the user profile 'Roshini B T' and notification icons.
